**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. It is suggested that the comma at the end of claim 2 be cancelled.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 8-15, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Byers '603. Regarding claims 4 and 10-11, note load pressure feedback passages 182 and 184 of Byers '603.
4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Byers '603 in view of Slavin et al. These claims are considered met by Byers '603 except that the load pressure feedback in Byers '603 is not accomplished by different diameter lands. Slavin et al shows load pressure feedback accomplished by different diameter lands 91 and 95. It would have been obvious in view of Slavin et al to substitute a load pressure feedback accomplished by different diameter lands for the load pressure feedback passages 182 and 184 of Byers '603.
6. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Byers '603 in view of Hiroki. This claim is considered met by Byers '603 except that the load

pressure feedback of Byers '603 is not accomplished by load pressure feedback pins. It would have been obvious in view of the load pressure feedback pins 64a and 64b of Hiroki to provide load pressure feedback pins in load pressure feedback passages 182 and 184 of Byers '603 as an equivalent alternative method of providing load pressure feedback, especially when it is desired to provide an area smaller than the cross-sectional area of the spool which is responsive to load pressure feedback, to decrease the feedback force.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claim 17 is further rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no antecedent basis for "the second tank port", "the second load port", "the first tank port", and "the first load port" in the last 5 lines of claim 17.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gerald A. Michalsky whose telephone number is (703) 308-1049. The examiner can normally be reached on M-F 5:30 AM - 2 PM.
